

# CHAIRMAN'S STATEMENT

## ON SUSTAINABILITY

**Dr. Pramod Chaudhari**  
Executive Chairman Praj Industries

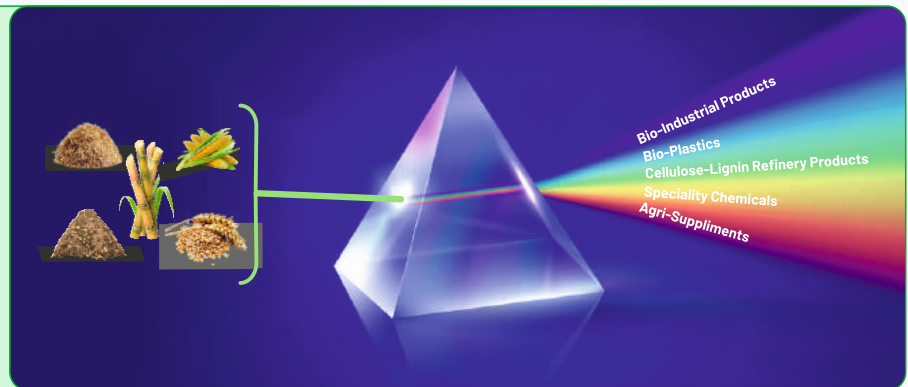

Our vision is to make the world a better place by deploying the solutions for sustainability and conservation of the environment. Our strategy has been to broaden the horizon leveraging our innovative end to end technology solutions in Bioeconomy. **And, We will do this through the Bio-Mobility® Bio-Prism® platform.**

Under Bio-Mobility® platform, we cover Low Carbon 1G Ethanol, Ultra Low carbon 2G Ethanol, Compressed Bio-Gas (CBG), Bio-Diesel and Bio-Methanol, Marine Biofuels, Bio-hydrogen and Sustainable Aviation Fuels (SAF). Some of these are blends and some of these are being developed as 'drop in' fuels.

Bio-Prism® Platform comprises of renewable Chemicals & Materials (RCM) solutions & promises sustainability while protecting the nature.

We focus on development of renewable chemicals, bio materials and bio polymers such as lactic acid, polylactic acid (PLA), polyhydroxy alkanates (PHA), Biorefinery co products like Cellulose, bio-bitumen, rice protein etc..

Bio-Prism® platform can be explained by the picture above.

### Our Partners In This Endeavor are As Listed Below.

Areas	Partnerships/Associations	Key Objective
Academic		Co-development, Research
Market		Business growth, Expansion
Customer		Re-define India's 2G Ethanol Market
Technology		Keeping Technology Edge
Association		Networking, Policy Advocacy

While closing, I wish to reiterate that when we promise ourselves of a bright and prosperous future through innovative technologies and collaborative global partnerships with reputed institutions, we should not lose our focus on the mitigation of the negativities of our own business operations.

Our technologies, plants and equipment save steam and electrical energy, provide zero liquid discharge, promote safety and health of customer employees, inhibit groundwater pollution, reduce waste and improve yield and generate a huge potential to save on fossil based carbon emission.

It is equally important that internally we must have progressively stringent targets of sustainability performance. We must have continual and systematic mitigation of negative impact of our own business operation and that of our supply chain.

Our PDCA improvement system should become a model of operations for our customers.
